

What's In My Kitchen?

mobile application

Alexandria Ogden | Mitchell Griest | Jenna Lisicky

Problem Definition

Re-buying groceries due to forgetfulness

Done

Features

Not Done

Inventory of items stored in local DB

Add item

Delete item

Update item name

Update item color

Drag to update item quantity

Sort inventory based on 4 different rules

Search for item by name

About the developers

Credit screen

Item icon

Lessons Learned / Discussion

Take time to learn how to code in a group setting

Spend less time on Requirements Documentation

Android is challenging

Difficult to debug, especially SQL

Manual XML is better than auto-generated XML by drag and drop

GitHub essential for fatal bugs - previous commits

Demo
